Vein Clinics of America Opens New Location in Kankakee

Kankakee, Ill. (April 18, 2005) —Vein Clinics of America (VCA) has opened a new clinic in Kankakee, Ill. This clinic specializes exclusively in the non-surgical treatment of varicose veins, leg ulcers, and other related vein disorders.

“Residents of the Kankakee River Valley have always had access to the latest techniques in medicine,” said Dr. Charles Martin, VCA. “I am excited about bringing state-of-the-art care for varicose veins to my friends and neighbors. Everything is done on an outpatient basis and right here in our community.”

The new clinic will be located at 401 N. Wall St. It is open from 9 a.m. to 5 p.m. on Wednesdays. To schedule an appointment call 800-660-VEIN.

VCA is the largest medical practice in the United States specializing exclusively in the non-surgical treatment of varicose veins, leg ulcers and related vein disorders. Unique to the treatment of varicose veins, VCA offers state of the art endovenous laser treatment (ELT) in addition to their non-surgical, minimally invasive COMPASS protocol of sequential ultrasound-guided foam sclerotherapy. As a result, VCA meets the needs of each patient, providing treatment for the largest ropy varicose veins to the smallest spider vein. Procedures are performed in the physician’s office and are incorporated into a treatment plan designed to lessen the possibility of progression and recurrence common to varicose vein disease.

Founded in 1981, VCA has 22 locations throughout Georgia, Illinois, Indiana, Kansas, Maryland, North Carolina, Tennessee, Virginia and Wisconsin. They can be accessed on the Internet at www.veinclinics.com.

For more information regarding vein disorders, ELT or COMPASS procedures, call VCA at 1-800-660-8346.
